

Calogero Sanfilippo

Curriculum Vitæ

Professional experience

2024–now **Software Architect**, *Gucci*, Milan.

- As part of Gucci's replatforming initiative, leading the design of systems emphasizing high cohesion and low coupling to improve maintainability and scalability.

2024–now **Security Champion**, *Gucci*, Milan.

- Acting as the teams' reference point for secure coding practices and compliance, the role involves vulnerability severity assessments and contributing to risk evaluation and mitigation strategies.

2021–now **Senior Software Engineer**, *Gucci*, Milan.

- Lead product developer in the agile team of the Gucci App, driving the technical evolution of the Gucci mobile application, with a focus on delivering a more personalized user experience.
- Adopted SwiftUI for all new features to modernize the user experience and accelerate UI development; introduced Clean Architecture and MVVM patterns to decouple layers, simplify testing, and improve maintainability.
- Introduced Kotlin Multiplatform (KMP), reducing duplicated mobile business logic and accelerating feature delivery across iOS and Android.

2017–2021 **Manager**, *Accenture*, Milan.

- Technical lead of a distributed mobile team (25 developers across 5 countries), overseeing architecture, code quality, and delivery of native mobile applications for a large-scale international fashion retail
- Adopted SwiftUI for all new features to modernize the user experience and accelerate UI development; introduced Clean Architecture and MVVM patterns to decouple layers, simplify testing, and improve maintainability.
- Defined coding practices and CI/CD pipelines on Azure DevOps.

2015–2017 **Senior Consultant**, *Reply*, Milan.

- Technical lead of the team developing a multi-platform (iOS/Android) smart home application for the home gateway of a major telco, adopted across multiple European markets.
- Directed the implementation of a full-featured SIP client, enabling reliable real-time communication.
- Engineered robust connectivity through low-level API integration with home gateway hardware, ensuring stability and performance.
- Coordinated cross-functional teams to deliver scalable, market-specific features tailored to regional requirements.

2013–2015 **Senior iOS Developer**, *deltatre S.p.A.*, Turin.

- Led iOS development for Diva, a data-driven sports video player based on HLS, powering global events such as the Olympic Games and FIFA World Cup.
- Delivered seamless integration of live match statistics with video playback, boosting viewer engagement for major broadcasters including BSkyB, CBC, and NHK.
- Solved complex challenges in metadata handling and real-time data–video synchronization, ensuring a smooth and immersive user experience.

2011–2013 **iOS Developer**, *Reply*, Turin.

- Designed and developed a second-screen television application for a major telco in Italy, featuring a custom SMB-based streaming architecture, non-native codec support, and strict adherence to performance, scalability, and UX standards.
- Designed and developed Magnet Enterprise, a project management app, available on iPad, for Topcon Tierra, delivering an intuitive interface for tasks, calendars, and maps.

Education

April 2011 **M.Sc. in Computer Science & Engineering**, *Politecnico di Torino*.
Graduated *summa cum laude*

April 2008 **B.Sc. in Computer Science & Engineering**, *Università degli Studi di Palermo*.
Graduated *summa cum laude*

Technical Skills

Languages Swift, Objective-C, Kotlin; working knowledge of TypeScript, Python, Java

Mobile Native iOS (UIKit, SwiftUI), Android, Kotlin Multiplatform; basic Flutter

CI/CD Bitrise, Azure DevOps, GitHub Actions.

Paradigms Object-Oriented programming, Functional Programming

Architecture Clean Architecture, Hexagonal Architecture, MVVM

Leadership & Collaboration

Proven track record in leading multicultural teams across diverse geographies, fostering collaboration and shared success.

Strong adaptability, demonstrated through thriving in fast-paced and evolving work environments.

Solid experience in building and nurturing customer relationships, ensuring trust and long-term engagement.

Committed to mentorship, guiding peers and junior colleagues to achieve growth and excellence.

Promoted secure development practices, compliance awareness, and integration of automated security checks.

Open Source Projects

aral An XML push parser for Kotlin Multiplatform - https://github.com/csanfilippo/aral

swift-sgp4 A Swift package to compute satellite positions from two-line elements - https://github.com/csanfilippo/swift-sgp4

sfera A Swift library for parsing, building, and encoding GeoJSON (RFC 7946) with type-safe Codable models - https://github.com/csanfilippo/sfera

Known Languages

Italian Mother tongue

English Fluent (C1)
